

External Mapping settings

If you are using Active Directory to manage logins and roles, you need to ensure that library staff are in an Active Directory group which you can then match to the roles within SOLO/GLOBAL. This is being documented in greater detail separately.

To access System Configuration Maintenance, select **System Management > System Configuration Maintenance**.

Click on the External Mapping tab to display the page as follows:

The screenshot shows the 'System Configuration Maintenance' interface. At the top, it says 'Powered By Soutron'. Below this is a navigation bar with tabs: Common, Selfissue, Reservations, Routing List, Auto Cat & Images, Review & Rating, API, YouTube integration, External Mapping (selected), and My Account. On the left, there is an 'Actions' menu with options: Save, Save and close, and Cancel. The main content area contains four rows of configuration settings, each with a label and a text input field:

External name of role "Administrator"	<input type="text" value="SOUTRONLMSAdmin"/>
External name of role "Clerical"	<input type="text"/>
External name of role "Librarian"	<input type="text"/>
External name of role "Catalogue Administrator"	<input type="text"/>
External name of role "ReadOnly"	<input type="text"/>

For the configuration settings for this page, please refer to Soutron's Active Directory implementation guide.
